

Key facts

- Lightweight mineral wool developed for medium temperature applications in industry
- Energy savings
- Excellent thermal and acoustic properties
- Excellent thermal properties (thermal conductivity) which reduces heat loss
- Shot free
- Lightweight product, easy to handle and cut
- Outstanding flexibility: can be bent around larger curved surfaces or irregular shaped surfaces
- Fast and efficient installation
- Chemically inert and when applied under controlled conditions will not promote or cause corrosion.

Marketing description

Medium temperature resistant mineral wool blankets stitched onto galvanised wire-mesh for industrial and technical applications.
