

Ductwrap Application Specification

- Ductwrap: (25/40/50)mm of 18kg/m³ density
- Performance criteria:
 - K-value: 0.038 W/mK for 18kg/m³ (ASTM C518)
 - Combustibility: Non-combustable (SANS 10177 Part 5)
- Specification:
 - Install (25/40/50)mm Ductwrap over (air-conditioning /heating/cooling) ducts.
 - Staple all the joints and seal with pressure sensitive tape matching the Ductwrap facing. Where rectangular ducts are 600mm in width and greater, Ductwrap shall be additional secured with strapping at 300mm centres.

To be is read in conjunction with Glasswool handling Instructions in the Installation methodology.
